# Hello again, Rescuers!

Thanks to your hard work, many of Bugtopia's residents have been rescued. We also discovered the truth behind the disappearances of the Book Bugs.

However, it is not time to rest yet. Please keep reading as many stories as you can. This will give us the strength we need to close this chapter and bring all our stories back to life!

**Yours with determination,  
Attie**

Solaris, a vast and mysterious Land, home to brilliant inventors and resourceful scavengers.

In the midst of the chaos in Bugtopia, the Guardians — Gedebak, Naga, Xue Yu, and Nilavoli — have called for an emergency meeting...

Every story must have its end, so other stories can begin. The End Bug must be found!

This letter holds an important clue to his whereabouts...

## Activity

The letter that Nilavoli has is written by the mysterious Raven.  
Help the Guardians locate The End Bug!

Dear Nilavoli,

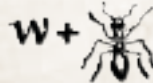

I send clues to worthy friends like you in the hopes that once you know what I know, we may all restore the end to its proper place. Still, I cannot speak plainly, for it is in my nature to pose puzzles and riddles to everyone. You see, only I possess the gift to see into the future, and I cannot share my knowledge without testing you first.

First, you must show that you have a flexible mind. Solve these rebus puzzles.  
(Hint: The answers are all popular sayings!)

### Think

\_\_\_\_\_

\_\_\_\_\_

Now, you must demonstrate that you can put things in their rightful place. Circle the word that does not belong with the others.

Rain

Waterfall

Land

Brook

River

Rapids

Stream

Put the circled words from the three puzzles together, and you will find the answer you seek — The End Bug's location. Where in Solaris is The End Bug?
